

KANYAWEE TIPMOD

Front End Developer

About Me

As I enter my third year, I am actively seeking internship opportunities where I can apply the knowledge and skills I have gained from my coursework in a real-world setting. I am particularly interested in internships related to software development, web applications, or designer. I believe that hands-on experience in a professional environment will not only help me grow technically but also enhance my teamwork and communication skills.

Skills:

Design or Redesign Application and website by Figma, Adobe

Programming

Languages: HTML, CSS, JavaScript, Java, Python, TypeScript (Node.JS)

Project and Notable Achievement:

HAMTAROT

- A project during my first year of study about a website for fortune telling about daily life, studying, love, finance, and work.

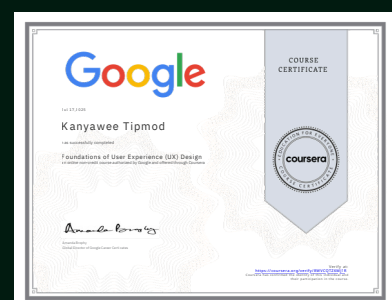

MIXIT

- A project during my second year of study about a website that combines games in a community format to talk about games that interest me or ask questions.

Karuphan-Hospital

- This project is a final-year capstone system developed for the Primary and Holistic Care Unit (PCU) at Kiri Mat Hospital. It aims to streamline the management of hospital assets.
